WHAT IS ROGAINING?

A rogaine is a cross-country navigation event on foot, using a map and compass. This event will take you over a mix of challenging farmed and indigenous scrub-covered hill country and associated valley floors.

Each person in your team (comprising 2 to 5 people) is given a standard topographical map with about 35 checkpoints of differing points value marked on it. A clue is provided to help you locate each checkpoint, e.g. “A saddle, N side”. Teams collect points by visiting checkpoints over the duration of the rogaine. The team with most points wins. It pays to finish on time, late finishers lose points.

As a team you choose your own route and distance within the mapped area. You decide which checkpoints to visit and in which order. You can be as competitive or as social as you choose. Water may be provided at one or more locations on the course. A light hot meal is served after the event, courtesy of local resources. Spot prizes reach a new standard for this type of event.

Plan your course well. Rogaining is as much about careful route choice and navigation as it is about physical endurance. For fit, first-time people, plan on about 2 to 2.5 kms per hour average over the whole event time. If you find you travel faster or slower adjust your course as you go.
