WHAT IS A ROGAINE??

A rogaine is a cross country navigation event, in which teams travel on foot across varied terrain using a topographical 1:50000 map and a compass. Teams choose their own route to visit various check points in any order. The check point is located from the map. For this event, a clue fixes the final location of a small coded tag, or permanent object/sign. The team with the most points wins. NZRA rules apply except that the maximum number per team for this event is four.

For further information see the NZRA website: http://www.rogaine.org.nz
