New Zealand Rogaining Association (Inc.)

Newsletter No.1

1st October 2002

By now, Bruce McLeod's 12 hour Raggedy event on August 19th is history. This was the first event organised under the NZRA umbrella, and the Heights of Winter rogaine was the first rogaine organised directly by the NZRA. The decision to establish a Rogaining association does seem to have provided a catalyst for more events to be organised and also for more people to express interest in organizing or helping to organise rogaines.

Annual General Meeting

The first AGM of the NZRA will be held next week. You should have received notice of this already. Business will be mostly pretty routine stuff, like the approval of our Incorporation and presentation of accounts, and election of officers (committee, treasurer, secretary, chairperson etc.). However some issues to be decided include affiliation to the International Rogaining Federation, and a regional committee structure.

Coming Events

Keep you eye on the website Event Calendar for coming events. Of particular note are:

- Bruce McLeod's "Queenstown Epic" in November (entries close 18th October). Bruce's events are always a must.

- A 24 hour Rogaine in March 2003 in Otago, near Roxburgh. Peter Squires is the chief organiser and he reports that he has found an excellent site. The landscape is rolling hills and gullies, relatively free of impassable vegetation, and with a variety of grass cover from tussock to sown grasses. It should be possible to travel in any direction on the map. More details and entry forms will be available on the website by the end of October.

There are also rumours of a 6-hour event or two in North Canterbury during the summer. These will be entered in the Event Calendar as soon as they are confirmed. Events in the Hawkes Bay (December) and Autumn Mists, Wairarapa (May) are also noted in the Calendar.

Volunteers

We are evolving a relatively low-labour method of organising rogaines by using local community groups to do the catering. However we still need volunteers to assist in everything from organising the whole event, down to assisting with the handling of event entries. Some jobs, eg. entries and advertising, can still allow the volunteers to actually compete in the event, and can be done from anywhere in the country. Areas in which assistance can be helpful are one or more of – Landowner liaison, Course planning, Putting out / retrieving checkpoints, Equipment maintenance and management, Catering team liaison and management, Course checking, Water drop organisation and management, Results recording and handling etc.

If you feel you can help with an event then please offer your assistance to the organiser.

Remember – Entries for the Queenstown Epic close 18th October
