4. Correction of Errors

In the Reporting of the year ended 31 December 2017 there were a number of issues that have come to attention since the board accepted the statements.

1. An Investment Maturity of $10,059.48 was wrongly classified as income and offset with an accompanying expense.
2. Multiple expenses accounts such as insurance levies and navlight expenses were accounted for without an expense ever being paid. Again this was offset with an accompanying income. This was done as a book entry due to an attempt to record expenses from NZRA ran events.

The outcome of these means that there was artificial income and expenses created. These did not affect the overall statements but needs to be noted as it means that the NZRA was not required to be GST registered for 2017 due to not truly surpassing the $60k threshold.
